

Workflow of the system

HERE IS HOW THE SYSTEM WILL WORK

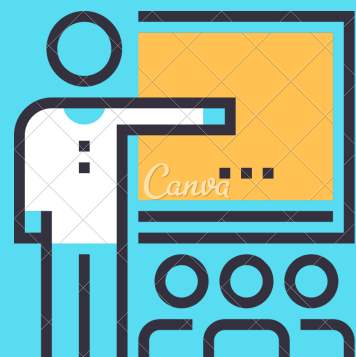

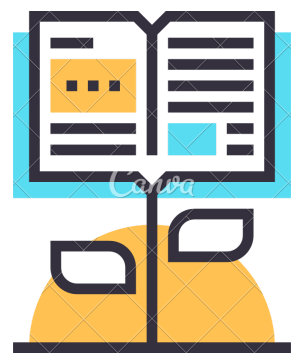

ADMIN

- Admin will be able to create credentials for employees.
- They will also be responsible for creating directories and providing appropriate permissions to users

EMPLOYEE

- Will be provided login credentials
- Can upload/download files inside directories (depends on permission)

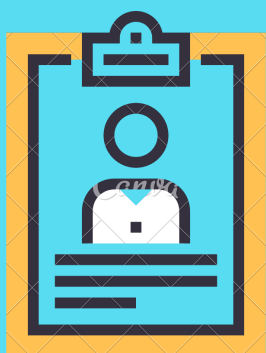

FILES

- Users can download/upload files based on permission.
- Public directory contains files accessible to all the users.

DIRECTORY

- Permission can be provided to specific users.
- Contains files with last upload/download information

UPLOAD/DOWNLOAD

- Files can be uploaded/downloaded based on permission
- Before uploading a file user will be prompted with information about latest upload(time, uploader) and asked to check for any conflict.
